DETAILED ACTION

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because, although the drawings presented by applicant have not been previously objected by the Examiner, the Applicant is advised to submit new formal drawings since, in some drawings, it is not clear which numeral refers to which particular structure. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Examiner Statement of Reasons For Allowance

2. Claims 18 and 21 are allowed because the prior art fail to teach a method of fabricating a glide head comprising slicing a plurality glide bodies from a wafer, depositing thermal transducers on the plurality of glide bodies, in combination with the remaining limitation of claims 18 and 21.

Claims 7-8, 12-13 are allowed as indicated previously.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited in the PTO-892 and not mentioned above disclose related devices and methods.
